kidding me? this is damn good game u all need to try. never got bored with this game. Buy this game, !!! I have the requirements installed and meet the hardware prerequisites, but it keeps crashing when I start the game. Looked cool but I'll never know buying a dud.. Honestly I only got it with the bundle. It looked pretty cool being able to form the environment and what not but it is not user friendly. The viewing controls along with the speed of looking/v moving around is too difficult. Maybe theres some setting to fix it but I dont know. Im more stuck on the other software to put any time into this one.. cheap game and big fun. oh gosh my butt! 10/10. very cool would buy again. I love hidden object games and was happy to find one with an Egyptian theme, but this game really is remarkably bad. I got halfway through the chapters in less than an hour and couldn't convince myself to play it any longer. The story isn't compelling, the dialog is trite, and the hidden object scenes are all neutral-colored pixellated junkpiles. It's a neat idea to play through the story as different family members, but clearer graphics and a more logical story direction would have made a world of difference.. Great character, probably one of ther greatest designs. She's fun to play and it's nice that she comes with her own story, too.. I don't recommend getting this dlc, b/c when I try to play said dlc the game menu brings up the store page.. An addicting game with a unique play style. Definitely worth checking out!

It's ok. On the surface it's a good tower defense game with caterpillars fighting each other with machine guns and such. My main problem with the game is that have to grind a little in order to progress by going back to previous levels and earning more apples to upgrade your army. Don't get me wrong, it's still a fun game but the grinding took me out of the moment and I was just not feeling it for the game. 6/10 for me.. Fun Game!

A lot of fun figuring out the most powerful combos to beat each level with. Only thing that I don't like is having to wait for the credits every time I beat the last boss. Other than that a really fun game.. This game has taught me a lot about myself and life. I always thought I was good at game, but this game proved me wrong. The biggest lesson I learned from this game is that failure is not the end.

Although I failed a lot, it was fun failure.

I made a short video about Chrono Ghost play, and you can check more about the game here.

[It's a lot better than the ones I've used before over the years you can get up and running very quickly with a high quality terrain.](#)

[Once the updates which import into Unity 5 and Axis come out this will be the best ever.](#)

[I recommend it for now and await the promised updates.](#)

["Just as I thought, the devs have listened and already released the Unity 5 import of the terrain"](#)

[Way to go guys ... nice. Far worse than the 59 cents I spent on this game. I want my five minutes of wasted time back.](#)

[This is nothing like the first level of spore, the controls are terrible and gameplay is limited.](#)

[In five minutes I achieved all 26 achievements without intending to. I swam around and died once.](#)
